**BUILDING OFFICE AND WAREHOUSE.**

Mr. G. S. Parker began work yesterday on a large pressed brick building to be used as an office building and warehouse for sash and doors. His old office has been moved across the street next to his lumber warehouse and the new building is being erected on the site of his old office.

The building will be 30x150 feet, one story, and constructed of white pressed brick similar to that used in the city hall and opera house. His offices will be arranged with a view to every convenience and will be elegantly fitted up. The building will be a handsome addition to North Main street and is a further evidence that we are gradually growing out of the old country town habit and merging into an active, up-to-date little city.

### FOR SALE.

The two wooden buildings near my office that have been used to store sash and doors. G. S. Parker. 46 You had better hurry if you want to get some of those cheap shirts at Parks & Waldrop's Big Shirt Sale.

### NOTICE.

## Have You An Edison?

The superiority of Edison Phonographs and Records is so generally conceded that even official confirmation of the fact by an international jury of awards at the Alaska-Yukon-Pacific-Exposition can scarcely add to their reputation.

In Reproducing the Edison has no scratching grating sounds; simply a pure and true reproduction of the original rendition. No home can well afford to be without an Edison Phonograph.
